

Care Mission has diligently detailed our environmental management measures, exemplified through the completion and publication of a robust Carbon Reduction Plan. This plan serves as a cornerstone in our commitment to sustainability, aligning meticulously with the required reporting standards outlined in your tender.

#### Carbon Reduction Plan Highlights:

##### 1. Emission Assessment and Inventory:

We conducted a thorough assessment of our carbon emissions across various operational facets. This comprehensive inventory provides a baseline for measuring and tracking our progress in reducing carbon footprint.

##### 2. Targeted Reduction Goals:

Our Carbon Reduction Plan outlines specific and measurable goals to reduce greenhouse gas emissions. These targets are tailored to address key areas contributing to our environmental impact, fostering a strategic and effective approach.

##### 3. Implementation of Sustainable Practices:

Care Mission actively integrates sustainable practices into our daily operations. From energy-efficient technologies to waste reduction initiatives, our plan delineates specific measures aimed at minimizing our ecological footprint.

##### 4. Renewable Energy Integration:

We are committed to transitioning to renewable energy sources. Our plan highlights the steps we are taking to incorporate renewable energy into our operations, contributing to a cleaner and more sustainable energy profile.

##### 5. Employee Engagement and Training:

Creating a culture of environmental responsibility is vital. Our plan includes initiatives for employee engagement and training programs to raise awareness, foster a sense of responsibility, and ensure active participation in our carbon reduction efforts.

#### 6. Regular Monitoring and Reporting:

To track our progress transparently, we have established a robust monitoring and reporting system. Regular assessments and detailed reports will be published to demonstrate our achievements and areas for improvement, promoting accountability and openness.

#### 7. Collaboration with Suppliers and Partners:

Recognizing the interconnected nature of environmental impact, our plan extends to collaborating with suppliers and partners. We aim to ensure that our entire ecosystem aligns with sustainable practices, emphasizing shared responsibility.

#### 8. Continuous Improvement Framework:

Our Carbon Reduction Plan is not static. It embodies a dynamic framework for continuous improvement. Regular reviews, feedback mechanisms, and adaptability to emerging sustainability standards are integral to our commitment to ongoing enhancement.
